

## Publication of papers of WCCE10 in SPT or JAE

Dear colleagues,

After our 2nd Workshop on Electrochemical Engineering held two weeks ago in Barcelona within the framework of the 10th World Congress of Chemical Engineering, we kindly remind you that all contributors are invited to submit their work to Separation and Purification Technology (those most related to environmental applications) or to Journal of Applied Electrochemistry (general electrochemical technology).

Deadline for submissions will be end of January but we now need to know who of you are interested in contributing. Please send us an email by **November 8** in order to count on your contribution and let us schedule properly (please inform about Title and Authors).

Contributions to SPT have to be informed to Enric Brillas ([brillas@ub.edu](mailto:brillas@ub.edu)), whereas contributions to JAE have to be informed to Manuel Rodrigo ([manuel.rodrigo@uclm.es](mailto:manuel.rodrigo@uclm.es)).

Best regards,

--
