12TH EUROPEAN SYMPOSIUM ON ELECTROCHEMICAL ENGINEERING

ESEE 2020

June 14-18, 2020

Leeuwarden, The Netherlands

Electrochemistry for electrification and energy transition towards a sustainable future

It is our pleasure to invite you to attend the **12th European Symposium on Electrochemical Engineering (ESEE 2020)**, to be held in Leeuwarden, The Netherlands.

The scope of ESEE 2020 is “**Electrochemistry for electrification and energy transition towards a sustainable future**”, which captures our aim to showcase physical, chemical, and biochemical routes towards a future where electrochemical engineering is part of a sustainable society, closing resource cycles and contributing to zero-pollution mobility and manufacturing.

We are looking forward to seeing you at ESEE 2020 in Leeuwarden.

TOPICS

- Electrocatalysis and electrochemical technologies
- Safe water and air
- Corrosion science for durable materials
- Water electrolysis and fuel cells
- Novel energy storage devices, batteries, and electrochemical capacitors
- Bioelectrochemistry for energy conversion and resource recovery
- Green capture and conversion of CO₂
- Electrochemical recovery of raw materials
- Advanced membranes and electrodes for selective ion removal
- General session
